1550 nm FP Laser Diode in 5.6 mm TO-can

## Overview

Modulight's ML1220 series are high-performance Fabry-Pérot (FP) laser diodes in 5.6 mm TO-cans. The lasers emit single transverse mode at 1550 nm wavelength. The can package includes an InGaAs monitor photodiode for feedback loop.

ML1220 series is designed for digital optical communication networks with up to 2.5 Gb/s modulation speeds. Products are available with flat window cap, with ball lens cap or with low-profile aspheric lens cap for highest single-mode fiber coupling efficiency.
